Art Unit: 2142

1. Claims 1-13 are presented for examination.
2. The applicant always should use this period for response to thoroughly and very closely proof read and review the whole of the application for correct correlation between reference numerals in the textual portion of the Specification and Drawings along with any minor spelling errors, general typographical errors, accuracy, assurance of proper use for Trademarks <sup>TM</sup>, and other legal symbols <sup>®</sup>, where required, and clarity of meaning in the Specification, Drawings, and specifically the claims (i.e., provide proper antecedent basis for “the” and “said” within each claim). Minor typographical errors could render a Patent unenforceable and so the applicant is strongly encouraged to aid in this endeavor.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this action:

**A person shall be entitled to a patent unless -**

**(e) the invention was described in — (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for the purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language;**

4. **Claims 1-13 are rejected under 35 U.S.C. 102 (e)** as being anticipated by Giordano, III et al. (United States Patent Number: US 6,370,141 B1).

5. Prior to addressing the grounds of the rejections below, should this application ever be the subject of public review by third parties not so versed with the technology (i.e., access to IFW through Public PAIR (as found on <http://portal.uspto.gov/external/portal/pair>)), this Office action will usually refer an applicant's attention to relevant and helpful elements, figures, and/or text upon which the Office action relies to support the position taken. Thus, the following citations are neither all-inclusive nor all-exclusive in nature *as the whole of the reference is cited* and relied upon in this action as part of the substantial evidence of record. Also, no temporal order was claimed for the acts and/or functions.

6. The only argument presented by the applicant in his 29 September 2006 remarks directed to this remaining rejection was that Giordano does not disclose, teach, or suggest distinguishing a first packet switched network appliance from a second packet switched network appliance. **However**, Giordano clearly did not teach restricting his Internet Phone to only one Phone per col. 4 (lines 58-50) and col. 5 (line 60) to col. 6 (line 20) since each phone was customized to the

Art Unit: 2142

company's "particular" needs and/or the user had to distinguishing that user from other users (in the plural). It was anticipated that all these users and companies did not only use one manufactured Internet Phone. Also, since it was an Internet Phone, it was identifiable by a unique phone number or IP address custom to computerized devices on the Internet. Thus, it was anticipated more that one such Internet Phone was in use and thus requiring unique identification among them to route the correct configure routine to the correct Internet Phone. Also, it takes two phones to communicate.

**7. A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) days from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02, 710.02(b)).**
